ENERGY COOPERATION IN THE MEDITERRANEAN - KEY MESSAGES

Infrastrutture energetiche per l'Italia e per il Mediterraneo

Marzo 2020

- ✓ **An important transit corridor for energy commodities**
- ✓ **An energy mix still heavily reliant on fossil fuels**
- ✓ **Energy Transition is occurring at different speeds around the Mediterranean**
- ✓ **About 1.9 billion € needed in the next 10 years to implement the transition**
- ✓ **COVID19 has exacerbated the existing problems and re-orientated some investment plans**
- ✓ **More than ever, the current situation has highlighted the need for increased regional energy cooperation – towards a Euro-Mediterranean Green Deal**
- ✓ **The 25th anniversary of the Barcelona process can provide the framework for a collective response to such an unprecedented crisis**
- ✓ **Thanks to its strategic location, the historical ties with South countries and the dynamic industrial sector, Italy has a clear role to play**
